COURSE

Introduction to Python

Basic ★ 4.8+ 9,903 reviews Updated 02/2026

Master the basics of data analysis with Python in just four hours. This online course will introduce the Python interface and explore popular packages.

Course Description

An Introduction to Python

Python has grown to become the market leader in programming languages and the language of choice for data analysts and data scientists. Demand for data skills is rising because...

🔗 What you'll learn

- ✓ **Identify** Python data types (int, float, str, bool) and use them in calculations and variables.
- ✓ **Recognize** how to create, subset, and modify lists, including nested lists.
- ✓ **Differentiate** between functions, methods, and packages, and apply them to solve tasks.
- ✓ **Identify** NumPy arrays, distinguish them from lists, and assess their role in data analysis.
- ✓ **Evaluate** NumPy statistical tools (mean, median, std, correlation) for data insights.

PREREQUISITES

There are no prerequisites for this course

CURRICULUM

Course outline

1 **Python Basics**

An introduction to the basic concepts of Python. Learn how to use Python interactively and by using a script. Create your first variables and acquaint yourself with Python's basic data types.

▶ Hello Python!	50 XP
<> Your first Python code	100 XP
<> Python as a calculator	100 XP
▶ Variables and Types	50 XP
<> Variable Assignment	100 XP
<> Calculations with variables	100 XP
<> Other variable types	100 XP
<> Operations with other types	100 XP

FAQs

Is Python ok for beginners?

Python is a popular choice for beginners because it's readable and relatively simple to use. That's why many data science beginners choose Python as their first programming language. As Python is free

and open source, it also has a large community and extensive library support, so beginners can easily find answers to popular questions and discover pre-made packages to accelerate learning.

What is Python used for?

How do I get started with Python?

Why take an online Python course?

What skills or experience do I need before taking a Python course?

How long does it take to learn Python?
